The 1986 Chernobyl disaster triggered the release of substantial amounts of radioactive contamination into the atmosphere in the form of both particulate and gaseous radioisotopes. As of 2020 it is the most significant unintentional release of radioactivity into the environment.. The work of the Scientific Committee on Problems of the Environment (SCOPE), suggests that the Chernobyl incident ...

Effects of the Chernobyl disaster - Wikipedia

The leatherback sea turtle (*Dermochelys coriacea*), sometimes called the lute turtle or leathery turtle or simply the luth, is the largest of all living turtles and is the fourth-heaviest modern reptile behind three crocodilians. It is the only living species in the genus *Dermochelys* and family *Dermochelyidae*. It can easily be differentiated from other modern sea turtles by its lack of a bony ...
