Carl Edward Sagan (/ ' s eɪ g ə n /; November 9, 1934 – December 20, 1996) was an American astronomer, planetary scientist, cosmologist, astrophysicist, astrobiologist, author, poet, and science communicator. His best known scientific contribution is research on extraterrestrial life, including experimental demonstration of the production of amino acids from basic chemicals by radiation.

Carl Sagan - Wikipedia

The science fiction genre dates back to the second century. A True Story, written by the Syrian satirist Lucian, is thought to be the first sci-fi story, which explored other universes and extraterrestrial lifeforms. Modern science developed during the Age of Enlightenment, and writers reacted to scientific and technological advancements with a wave of sci-fi stories like New Atlantis by ...

What Is Science Fiction Writing? Definition and ...

The simplest model of a growing galactic empire is a swelling balloon. Starting at the origin planet the spherical colonization wave will grow at the rate of empire expansion.. The much more messy and difficult to figure model of expansion is via Civilization Clusters. But this model more or less precludes the existence of an empire anyway, so it can be ignored by science fiction writers trying
