## **Hiab | Hiab Loader Cranes**

When calculating what crane size you need, there are many variables to consider. The three most important are weight, radius and height. A crane size estimate can be based on the weight and radius but the height of the lift is almost equally important when checking a crane size is suitable for a specific lifting operation.

Our Hiab is a 53/Y PM crane coupled with a cheese wedge plant body, which is mounted on a 32-ton rigid lorry, with eight wheels. With such a robust specification and a solid, reliable lorry under it, it's far quicker and easier to list what our lorry mounted crane \*can't\* lift, than to list all the possibilities it has for companies who hire it.
