Background: The Advanced Lung Disease Service is a unique, new model of integrated respiratory and palliative care, which aims to address the unmet needs of patients with advanced, non-malignant, respiratory diseases. This study aimed to explore patients' and carers' experiences of integrated palliative care and identify valued aspects of care.

### **Integrated respiratory and palliative care leads to high ...**

It is often most appropriate to integrate palliative care into the multidisciplinary team with specialist palliative care clinicians working alongside the respiratory team. This encourages a focus on symptom management, supportive care and quality of life at an earlier stage in the disease process, and can facilitate discussions about advanced care planning and end of life issues.
