**"Introduction to Real Analysis" by William F. Trench**  
The theorems of real analysis rely intimately upon the structure of the real number line. The real number system consists of an uncountable set  $\mathbb{R}$ , together with two binary operations denoted  $+$  and  $-$ , and an order denoted  $<$ .The operations make the real numbers a field, and, along with the order, an ordered field.The real number system is the unique complete ordered field, in the sense that ...
