Standard Definition TV (SDTV) is an older version of digital TV, with picture quality similar to that of a DVD. Standard Definition usually has a resolution of 640 x 480 pixels and no defined aspect ratio. It's better than analogue broadcasts but can't compete with the quality created by new technologies.

### **What is TV Resolution? 4K, UHD and Full HD Explained**

A 65" TV and a 32" can both share the same resolution, but because of their size difference, the pixels are larger on the larger TV, since the same image is stretched over a larger surface. Using this data, it means that you need to sit closer than 7ft from a 55 inch TV to

Raygun / Getty Images Seating Distance . Along with screen size, the closer you sit to the TV also makes a difference. For example, if you shelled out money for a 55 or 65-inch 4K Ultra HD TV, you can sit closer to the screen than you may have with a previous HDTV of the same screen size and still get a satisfying viewing experience, as the pixels (the dots that make up the screen) are much ...
