Selection of basic Piping Metallurgy and Material (viz. CS, LTCS, AS, SS, etc.) for piping specification lies with Process/Metallurgy Engineer. The above selection is based on process, licensor, and/or intrinsic metallurgy requirement to suit process medium, like corrosion, high temp., pressure, etc. This basic selection shall also address special considerations for PWHT, special valve trim for NACE, corrosive services like acids, amines,

The piping material chosen depends on the application and the water quality. For example, heating systems often employ steel pipe because of its low cost, strength, and resistance to heat-while pure water systems are likely to use virgin polypropylene (PP) or polyvinylidene fluoride (PVDF) pipe. Basic material properties
