Assessment does not include specific changes at the molecular level, mechanisms for protein synthesis, or specific types of mutations. NGSS HS-LS3-1 Ask questions to clarify relationships about the role of DNA and chromosomes in coding the instructions for characteristic traits passed from parents to offspring.

DNA and DNA Replication Webquest - Distance Learning

...

Your job is to find if a mutation (change) in a specific part of DNA causes a change in the protein being made. Changes in DNA and proteins sometimes cause diseases. First, you will need to learn about how proteins are made from a DNA code. This is called protein synthesis. It has two steps: transcription and translation.
