Mining, Part 3: In his three-part series, Dr Buck Emberg presents a balanced examination of both the need for mining and the environmental consequences of extracting minerals. He explains that mining has been a human activity since before the Stone Age and will remain so in the future. He contends that mining is here to stay, and we must learn to live with mines and mining companies must learn ...

Mining Problems and Possible Solutions - Tasmanian Times

In Ecuador, Peru or Brazil, most of the illegal mining occurs in remote areas of the rainforest. Illegal operators target the river banks in search of gold, and they are highly mobile. These characteristics make it hard for governments to form task-forces due to the resources needed to oversee vast territories where states often lack permanent presence or control.
