This manual is a consolidated resource for effective energy management and greenhouse gas reduction solutions in the craft brewers segment. Solutions outlined can apply to all breweries, regardless of location and operational size. Guidance is provided for brewers that are just beginning to explore energy management and

Brewers Association Energy Usage, GHG Reduction, Efficiency ...

Overview. Central heating differs from space heating in that the heat generation occurs in one place, such as a furnace room or basement in a house or a mechanical room in a large building (though not necessarily at the geometrically "central" point). The heat is distributed throughout the building, typically by forced-air through ductwork, by water circulating through pipes, or by steam fed ...
