sciences below.

World Public Library: Technically, the World Public Library is NOT free. But for \$8.95 annually, you can gain access to hundreds of thousands of books in over one hundred different languages. They also have over one hundred different special collections ranging from American Lit to Western Philosophy. Worth a look.

Statistical Science In The Courtroom

Statistical Science in the Courtroom is a collection of articles written by statisticians and legal scholars who have been concerned with problems arising in the use of statistical evidence. A number of articles describe DNA evidence and the difficulties of properly calculating the probability that a random individual's profile would "match" that of the evidence as well as the proper way to interpret the result.

Statistical Science in the Courtroom contains articles written by scientists and professionals from a number of fields including statistics and the law. The 22 chapters of the book cover a number of fields where medical statistics and epidemiology frequently come in to play. Some authors have contributed to several chapters (Drs Gastwirth and Izenman), but generally the book appears as a collection of independent contributions.

Statistical Science in the Courtroom
