### Troubleshooting Small Gas Engines

Disconnected, dirty or fouled spark plugs are common causes for engines that won't start. For small engines, spark plugs typically need to be replaced every season or after 25 hours of use. You should also check to make sure the spark plug gap is set correctly. An improper spark plug gap could lead to engine knocking and poor performance.

Close choke. Set throttle to full. Pull starter rope to set engine on compression. Return starter rope, then give a full, steady pull. When engine starts, return choke to full open immediately. Position throttle control to desired setting..

### » Small Engine Troubleshooting

Clamp off the fuel line. Then compress the spring clamp and slide it backward on the fuel line. Pull the tubing off the carburetor nipple and catch the gas in a small bowl. Don't Google "small engine repair near me" next time your lawn mower won't start.

### How to Repair Small Engines: Cleaning the Carburetor ...

As you know, Ethanol fuel is blended with regular gas, that's not a problem for cars, but it is for small engines. Typically, the small engine is put away for winter with the gas still in the tank. The ethanol blend attracts moisture and the alcohol content in the gas evaporates. The result is gumming and rust - it's a carb killer.
